Get ready for Danish road toll from 1 January 2025

Check if you need to pay toll

See where and what you have to pay in toll

Do you often drive on Danish roads?

You can also buy a digital KmToll ticket

This way, you avoid fines

You must pay toll if your truck weighs 12 tons or more and is registered for freight transport.

Read more about weight at

vejafgifter.dk/en/weight.

Is your truck one of the vehicles that does not have to pay toll?

See the rules at vejafgifter.dk/en/who-has-to-pay.

Your kilometer-based toll depends on where you drive, and whether you drive in a low emission zone.

See where you have to pay at vejafgifter.dk/en/which-roads.

The toll is also calculated based on your truck's weight and CO2 emission class. See prices at vejafgifter.dk/en/how-much-do-i-have-to-pay.

The road toll box or app must be ordered and installed before 1 January 2025.

See which providers you can contact at vejafgifter.dk/en/see-who-to-contact-about-gnss-equipment.

If you do not pay toll through a provider, you must buy a KmToll ticket prior to driving on vejafgifter.dk/en/digital-kmtoll-ticket.

KmToll tickets can be purchased from 18 December 2024, and onwards. Your license plate will be automatically read and checked for whether you have paid the road toll through a provider or a KmToll ticket.

If you have paid the correct road toll, you avoid a fine of DKK 4,500.

See more about control and fines at vejafgifter.dk/en/fines.
